**Subject:** Bloom

David – Just wanted to loop back through with you on where we are with Bloom. Our folks continue to talk about potential options focusing on the Desulf Units and how Bloom addresses the canisters once they have been disconnected. The next meeting I believe is scheduled for next Friday. At some point, probably after the next meeting, you and I should talk about the options our staffs are developing. In addition, we continue to work with Bloom to get additional information to help us better understand their process. I will be looking to schedule a meeting with them in the future to discuss where we are regarding this issue.

Let me know if you have any questions.

Thank you – Shawn
